STRONG FINISHES

Stone Fork Kverneland Tines

- 39" Conus II cranked Kverneland tines (32" useable length)
- 25½" overall height
- Tines installed on 4" centres
- Ruggedly built
- Heavy duty back guard with 3 lb expanded metal grating

The HLA Stone Fork provides an easy way to clean up rocks and debris while allowing soil and fine materials to sift through. With an available model and duty rating to accommodate most equipment, HLA Stone Forks can be used in nearly any industry from landscaping professionals to next generation farmers, and industrial earth moving applications.

For increased versatility the Stone Fork (retainer style tine) models are available equipped with the HLA Utility Grapple or the HLA Split Grapple.
